

PREM SHINDE

Software Developer | Python | SQL | JavaScript

✉ shindeprem.160205@gmail.com ☎ +91-8999542585 📍 Thane, India 🔗 LinkedIn 🐙 GitHub

Profile Summary

Computer Engineering graduate with hands-on project experience in Python, SQL, data analysis, and data visualization. Skilled in data cleaning, transformation, exploratory analysis, and dashboard development using Python, Pandas, Power BI, Excel, and tableau. Familiar with Alteryx for data processing and workflow automation, with a foundation in OOP, DSA, and DBMS. Seeking entry-level opportunities in Python development, data analytics, or software engineering, with a focus on creating impactful kpi dashboards and data storytelling.

Education

Bachelor of Engineering in Computer Engineering, Vighnagarata Trust's Shivajirao S. Jondhle College of Engineering & Technology	2022 – 2026 Asangaon, Thane
---	--------------------------------

Technical Skills

Languages: — Python, JavaScript, SQL, Java

Backend & APIs — REST APIs, JWT Authentication, Role-Based Access Control, Swagger/OpenAPI

Databases — MySQL, postgresql

Computer Science Fundamentals — Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS

Frameworks & Libraries — Pandas, Scikit-learn, numpy, matplotlib, Django REST Framework

Tools & Platforms — Workflow Automation, Data Processing, Git, GitHub, CI/CD, Postman

Projects

Smart Employee & Office Management Mobile Application, *Python, Django REST Framework, PostgreSQL, React Native, JavaScript, JWT, Redis, Celery, Pytest, Docker, GitHub Actions*

- Developed REST APIs for employee, leave, attendance, and office management.
- Implemented JWT authentication, role-based access control, and QR-based attendance verification.
- Added pagination, filtering, input validation, exception handling, and structured logging.
- Integrated Redis and Celery for caching, notifications, and background task processing.
- Implemented Pytest testing and GitHub Actions CI/CD for automated builds and deployment.

Pharmacy Management & Billing System,

Python, Django REST Framework, React, JavaScript, PostgreSQL, JWT, Redis, Celery, Docker

- Developed a full-stack pharmacy management system for medicines, inventory, billing, suppliers, and sales.
- Built secure REST APIs using Django REST Framework with JWT authentication and role-based access control.
- Implemented batch-wise inventory tracking with low-stock and medicine expiry monitoring.
- Developed billing workflows with automated stock updates, discounts, invoices, and transaction history.
- Integrated PostgreSQL, Redis/Celery, API validation, Pytest, Swagger/OpenAPI, and Docker.

Business Sales Analytics & Risk Dashboard, *Python, Pandas, SQL, Power BI, Excel*

- Cleaned and transformed transactional data using Python and Pandas, handling missing values, duplicates, inconsistent data types, and data-quality issues.
- Performed EDA and statistical analysis to identify sales trends, customer patterns, regional performance, and unusual transaction behavior.
- Developed dashboards using Power BI and Excel to present key business metrics and analytical findings.
